PREFACE

This Mission Coverage Index (MCI) lists the intelligence targets imaged on the photography of this mission. Items in the MCI are arranged in three sections:

Section I provides short descriptions for newly identified targets and previously reported targets showing change, and also provides order of battle information.

Section II provides a listing of those targets which reflect no apparent change in facilities from the most adequate previous description. The MCI in which this description appears is designated by the appropriate mission number, prefixed by the letters "NAC" and appearing as the last entry on the photo reference line. Military installations where there is no significant change in facilities and where no order of battle can be determined are listed under this section.

Section III provides a listing of those targets which could be identified but not interpreted.

Targets in each of the three sections are arranged 1) by country, 2) within the country according to subject,

3) within the subject by WAC area, and 4) within the WAC area by geographic coordinates in ascending order. An explanation of column headings and photo reference data used in presenting the information is contained in the appendix. The map base used (when available) for the derivation of coordinates in this MCI is the latest edition of the US Air Target Chart, Series 200.

For the convenience of the user, an index to all targets is included following Section III. Targets in the index are arranged alphabetically within a country.

The user of this MCI is cautioned that the scan of photography was accomplished in a relatively short time and often without the aid of precise analytical and mensural techniques commonly employed in detailed photographic analysis. Consequently, although the information presented herein is essentially accurate, additional, detailed analysis may somewhat alter portions of the information.

MISSION HIGHLIGHTS

Mission 1004-1 accomplished during the period 16-18 February, and Mission 1004-2 accomplished during the period 19-22 February 1964, provide [REDACTED] photographic passes over the Sino-Soviet Bloc, the Middle East, Algeria and Tuamotu Archipelago. Approximately 69 percent of coverage is cloud free.

25X1B

Installations of special interest newly identified on Mission 1004 include Moscow Suspect AMM Phased-Array Radar; [REDACTED] and a probable nuclear weapons storage site located at Lozovaya Ammunition Depot.

Missile activity newly identified on Mission 1004 includes:

PBM		Launch Site Type
Location		
Novosibirsk		Completed IID
<i>MRRM TRBM</i>		
Location		Launch Site Type
Slavota		Fixed Field

SAM				
SA-1	SA-2	SA-3	SA-0	Support
0	36	9	0	5

Order of battle information of special interest includes:

NAVAL ACTIVITY				
Location	Vessel Type	Firm	Probable	Possible
Al Iskandariyah, Egypt	SS	7		1
Port Facilities	PGMG	5		1
Pechenga Naval Base Lin- akhmari	SS	1		1
Yokanga Naval Base and Ship Repair Yard	SS	4		
Litsa Bay Submarine Base	SS		5	
Gdynia Naval Base Oksywie, Poland	SS		1	
Sovetskaya Gavan Complex	SS	4		
Vladivostok Complex	SS	1		
Strelak Strait Naval Base Anna	SS		1	
Petrovka Shipyard	SS	2	1

SECTION II

SECTION II PROVIDES A LISTING OF THOSE TARGETS WHICH REFLECT NO APPARENT CHANGE IN FACILITIES FROM THE MOST ADEQUATE PREVIOUS DESCRIPTION. THE MCI IN WHICH THIS DESCRIPTION APPEARS IS DESIGNATED BY THE APPROPRIATE MISSION NUMBER, PREFIXED BY THE LETTERS "NAC" AND APPEARING AS THE LAST ENTRY IN THE PHOTO REFERENCE LINE; E.G. (NAC 9000). MILITARY INSTALLATIONS WHERE THERE IS NO SIGNIFICANT CHANGE IN FACILITIES AND WHERE NO ORDER OF BATTLE CAN BE DETERMINED ARE LISTED UNDER THIS SECTION.

APPENDIX**COLUMN HEADINGS****PHOTO REFERENCE DATA**

Target--This column contains the name of the target. If the actual name is unknown, a name is assigned consisting of the name of the city or town nearest the target followed by a description of the target's function. Where appropriate, the target name is followed by a capsule description. Target numbers assigned by the Committee on Overhead Reconnaissance (COMOR), when available, are listed directly above the photo reference data.

Coordinates--Coordinates are referenced to the southwest corner of the minute square. When the target covers a wide area, coordinates are given for its approximate center.

WAC-- This column provides the number for the World Aeronautical Chart covering the target area.

Target Numbers--This column is divided into two subcolumns. The first subcolumn lists, when known, the Bombing Encyclopedia (BE) number assigned to the target. The second subcolumn lists the target number assigned by NPIC. Target numbers, when used to reference an item, are prefixed by the WAC number of the chart on which the target appears.

The photo reference line, or lines, provides the pass number, frame numbers, and best-frame grid (Universal Grid No 1, February 1964) coordinates for the target in question. In addition, conditions which affect the appearance of the target on photography are given.

25X1D

The grid coordinates (10-12) refer to the frame immediately preceding and give x and y coordinates for locating the target on that frame. C indicates that the target was clear. Symbols used to indicate conditions which affect the appearance of the target on photography are as follows: C (clear); SC (scattered cloud cover); HC (heavy cloud cover); H (haze); CS (cloud shadow); SD (semidarkness); O (obliquity); S (snow); and, PQ (poor image quality).
